MET Institute of Computer Science

Program No	2
Roll No	1262
Title of Program	Bank Account Statement
Description	Design a class bank account to represent customers in a bank. provide facilities such as withdraw, deposit and transfer funds for the account. Assume appropriate data members. design a test class to test the functionality. Minimum balance in account should be 500 rupees

Advanced Java

Source Code:

```

class BankAccount{
    //Instance variable
    private long accno;
    private String acName;
    private double balance;
    BankAccount(){
        this.accno=0;
        this.acName=" ";
        this.balance=0.0;
    }
    BankAccount(long accno,String acName,double balance){
        this.accno=accno;
        this.acName=acName;
        this.balance=balance;
    }
    //Access and mutators
    public void setAccno(long accno){
        this.accno=accno;
    }
    public void setAccName(String acName){
        this.acName=acName;
    }
    public void setBalance(double balance){
        this.balance=balance;
    }
    public long getAccno(){
        return this.accno;
    }
    public String getAcname(){

```
